DSVP11N DISPENSE VALVE

2-Way, direct-acting, gravity fed solenoid valve designed to dispense water or similar media from a tank.

Applications
- Hot & cold drink dispensers
- Tank or boiler draining
- Ice maker equipment
- Water purification equipment
- Potable water applications

Features
- UR, cUR, NSF, & CE Cert.
- Up to 3 psi differential
- Multiple port options
- Multiple bracket options
- Rectified AC coils [1]
- Fixed or adjustable flow
- Normally open version available

[1] AC coils are internally rectified. The rectifiers may require protection from transient voltages. It is recommended that a metal-oxide varistor (MOV) be placed in parallel at the coil.

[2] The CE Mark on Deltrol components indicates that the component is designed for use in a product required to comply with CE marking directives; certification to the LVD directive is only practical once the component is fully integrated into a finished product under the scope of either directive.

Vent Tube Options

The vent tube is only available to the right of the inlet on the #10 valve body.

THE VENT TUBE BREAKS THE VACUUM IN THE OUTLET PORT AND ALLOWS THE WATER TO EVACUATE THE VALVE WHEN IT IS SHUT OFF.

Alternate Coil Options

The coil termination options below are now available for our DSVP11N valve. Benefits include expanded connection options, improved ingress protection, and improved corrosion resistance.

**ISO 4400 (DIN 43650 FORM A)**
- IP-67 Rating
- Encapsulated class F (155°C) coil construction

**MOLDED-IN 20 GA LEAD WIRES**
- Connectors can be assembled to lead wires
- Encapsulated class F (155°C) coil construction

**DEUTSCH DT04-2P**
- IP-69 Rating
- Encapsulated class F (155°C) coil construction

**QUICK CONNECT 1/4” SPADE TERMINALS**
- Encapsulated class F (155°C) coil construction
Ordering Information - Non-Standard Configurations
(Minimum Quantities Apply)

When ordering, please provide as much of the following information as possible to help specify the appropriate valve configuration for your application. If you require assistance, please contact a Deltrol Controls Sales Engineer:

1. What voltage will be supplied to the valve?
   - 12VDC • 24VAC 50/60Hz
   - 24VDC • 110/120VAC 50/60Hz
   - 36VDC • 220/240VAC 50/60Hz

2. Do you require fixed or adjustable flow? (See Dimensional View on page 2)
   - Fixed  • Adjustable

3. What valve body option does your application require? (See Valve Body Options on page 2)
   - #1, #3, #4, #5, #6, #7, #8, #10, #11 (indicate Polysulfone or Nylon)

4. Do you require a vent tube? (See Vent Tube Options on page 3)
   - No  • Yes, left of inlet port  • Yes, right of inlet port

5. How do you want the coil terminals oriented? (See Coil Terminal Orientation Options on page 3)
   - Left of inlet port  • Right of inlet port
   - Over inlet port • Opposite inlet port

6. What coil spade terminal configuration will your application require?
   - Straight, as shown in the Dimensional View on page 2
   - Bent up (either 45° or 90°), away from valve body
   - Bent down (either 45° or 90°), toward valve body

7. What type of mounting bracket do you require? (See Mounting Bracket Options on page 4)
   - #1, #2F, #2B, #3F, #3B, #4F, #4B, #5F, #5B, #6L, #6R, #7(L,R,F,B), #9L, or #9R

8. What is the head pressure in your application in inches of water column?

9. Do you require an alternate coil option shown on page 5?
   - ISO 4400 (DIN 43650 Form A) • Molded-in lead wires
   - Deutsch DT04-2P • 1/4” spade terminals
Ordering Information - Standard Configurations

The parts listed below are standard configurations that are typically available through distribution. Please contact your nearest Deltrol distributor for small volume pricing.
